**SIDDESH LOHKARE**
Phone: +91 7977389203; Email: sidlohkare@gmail.com | LinkedIn | GitHub

## EDUCATION

**Bachelor of Technology in Computer Engineering | CGPA- 3.07/4** **Aug 2022- June 2026**
*School of Technology and Management, Nmims University*
Coursework- Object Oriented Programming, Database Management, Computer Networks, Programming for Problem Solving, Data Extraction and Processing, Data Structures and Algorithms, Professional Ethics, English Communication

## EXPERIENCE

**AI/ML Engineering Intern, Jio Platforms Ltd** **Dec 2025- Present**
- Built a full-stack video analytics app using YOLO object detection to track real-time office occupancy across 50 continuous video feeds with 90% accuracy.
- Designed a low-latency background pipeline with Celery and Redis to handle heavy ML processing, processing 30 frames per second while maintaining < 100 ms frontend response times.
- Containerized the entire stack (frontend, API, ML workers) with Docker, reducing deployment setup time by 25%.

**Intern, Jio Platforms Ltd** **May 2024- June 2024**
- Designed and built 4 interactive dashboards using Apache Superset, translating complex datasets into clear visual insights to help the Data Science team make daily decisions.
- Optimized dashboards to cut load times by 30% and ensured data integrity for stakeholder reporting.
- Automated data workflows to cut down manual data handling resulting in overall processing efficiency by 20%.

## SKILLS

- Programming Languages: C++, Java, Python, R
- Machine Learning: TensorFlow, scikit-learn, NLP, Deep Learning
- Database Management: MySQL, PostgreSQL, Big Data
- Frontend Development: Html, CSS, JavaScript, Angular JS
- Cloud: Google Cloud Platform (GCP), Azure, AWS
- Version Control: Git, GitHub
- Tools: MS Office, JIRA, Confluence, Orange
- Visualization: Tableau, Google Analytics, Power BI

## CERTIFICATION

- Advanced Learning Algorithms by Coursera
- Supervised Machine Learning: Regression and Classification by Coursera
- Cybersecurity for Everyone by Coursera
- Data Analysis and Visualization with Power BI by Coursera

## PROJECTS

**OfficeWatch: Enterprise SaaS Management Platform** **Feb 2026**
- Reduced database reads by ~80% by implementing a Redis read-through caching strategy for license tracking.
- Engineered an asynchronous Shadow IT detection system using Celery workers for non-blocking invoice scanning.
- Secured procurement workflows by implementing Role-Based Access Control (RBAC) with custom JWT middleware.
- Standardized deployment across microservices by containerizing the full stack using docker compose.

**Timetable Generator Using AI** **Nov 2025**
- Developed a production-ready web application for university scheduling using React.js, Flask, and PostgreSQL.
- Achieved 175x faster execution and zero conflicts by benchmarking Google OR-Tools against Genetic Algorithms.
- Architected an asynchronous, containerized backend using Docker, Redis, and Celery to optimize system responsiveness.
- Modeled complex constraints like visiting faculty availability; research accepted at IEEE PuneCon 2025.

**Legal Chatbot for Instant Legal Guidance** **May 2025**
- Created an AI-driven legal assistant chatbot using Python and NLP to improve access to legal information.
- Trained on curated legal FAQs, statutes, and case laws, increasing response relevance by 31%.
- Improved user satisfaction to 85% and reduced legal information retrieval time by 35%.
- Enhanced contextual understanding and response quality by 20% through iterative NLP tuning.

**Sentiment Analysis Using Machine Learning** **Sep 2024**
- Built a machine learning model using Naive Bayes and RandomForestClassifier for sentiment analysis on Twitter data.
- Pre-processed text data using SpaCy, including tokenization, lemmatization, and stopword removal.
- Achieved 89% accuracy on a dataset of 2000 tweets through model optimization.
- Developed a Flask-based web interface for real-time sentiment classification and visualization.

**Model Mental Health Website** **Mar 2024**
- Designed an intuitive website, elevating user satisfaction by 30%.
- Integrated real-time scoring, cutting wait times by 10% for a seamless user experience.
- Utilized JavaScript to captivate and engage website visitors, enhancing user interaction on the platform.
- Suggested enhancements, resulting in a 19% improvement in score calculation accuracy.

## LEADERSHIP

- Organized Model Shark Tank event in E Summit 1.0 as an executive member of Entrepreneurship Cell.
- Volunteered at Bindura Foundation, collaborated with NMMC on the RRR (Reduce, Reuse, Recycle) campaign.
